ACCEPT RESIGNATION OF SCHOOL TEACHER

Board of Education Holds Regular Meeting—Deals With Architects of New School—Phew! Kids Are Suffering From Pediculosis—Good Attendance At Both Schools.

The regular April meeting of the Board of Education was held in the council chamber on Thursday evening last, when the following were present: S. F. Williams, chairman, J. A. Campbell, Dr. D. Clark, J. A. Marsh, G. B. McConachie, Dr. J. F. McVay, A. E. Phillips, R. T. Theal, Vernon Tuck, J. H. Wells.

Burden and Gouinlock architects presented an agreement for the boards ratification for professional work on the new high school, and Chairman Williams, and Secretary W. F. Randall were empowered to execute the agreement.

On motion of Campbell and Campbell the football club was granted the use of school grounds for practice and regular games.

Accounts for March amounting to \$204.28 were passed, and \$184.50 paid for substitute teachers.

The resignation of Miss Laura Hamilton, of the public school nurse, was tendered, and came as a surprise to the board, but was accepted, with some censure.

The reports of J. S. Jackson principal of the high school, J. H. Forman principal of the public school, and Miss M. M. Collier, school nurse, were presented. In the high school there are 146 on the roll of which 78 are from the town, 49 from Lincoln county (North Grimsby), and 19 from Wentworth county (Saltfleet).

There are 79 girls and 67 boys. The average attendance for March was 123.

The report of the public school shows that an average of 90 per cent. attended during March, as follows:

Room	Attendance	On Roll
Room 1	32 out of 37	37

The report of Miss Collier showed five visits during the month; 498 inspections made; new defects found 15, corrected 14; pupils practicing health habits 70 per cent.

The teacher had co-operated with the nurse; the rooms were kept well; but the absence of drinking fountains was deplored. The nurse also regretted the prevalence of pediculosis among pupils.

MAKE VEHICLES CARRY LIGHTS

County Councils Now Have Privilege of Passing Bylaw Compelling All Rigs on Highways to Have Lights at Night

Over twelve years ago The Independent took up the question of the Ontario government passing a law compelling all vehicles that travel on the highways at night to carry a light front and rear. The Independent was the first to take up this question but as time went on other newspapers and municipal bodies agitated for a law of this kind.

The question has been brought up in the legislature several times during the past five years but no action was ever taken until last week when the municipal committee of the legislature approved legislation making it optional for each county to pass bylaws requiring all motor vehicles on a highway to carry a light or reflector after dark and before dawn.

This is a move in the right direction and Lincoln county council should at its very next meeting pass a bylaw compelling all vehicles in this county to carry lights.

8th HOLE BAND.

The first practice of the 8th hole band will be held tonight Wednesday, April 8, at Orange Hall at 8 o'clock. Members will bring drums and bugles. Corp. H. Clark, Gagan, W. Phillips, band committee.

THE HOME MERCHANT! WHO IS HE?

He is the chap who gives you back your money or makes exchanges when you are not satisfied with what you have purchased. He is the chap who meets you at the door with a handshake, and lets you cut with a message to the "kids" and a real "good-bye."

He is the chap whose clerks live in the town and spend their money with you and other local people. He is the chap who helps support our churches and charitable organizations and talks for the home town and boasts for it every day in the year.

He is the home merchant—your neighbor—your friend—your helper in time of need. Do you think you ought to trade with him? Don't you know that the growth and prosperity of this town depends very largely upon the success and prosperity of its home merchant? Out-of-town people judge our town by the appearance of our stores and by the degree of enterprise shown by our merchants. And our home merchants succeed when home folks give them loyal support. Make a resolution to buy at Home.

LOOKING FOR TROUBLE?

You will never fear the trouble that comes your way if you are cheerful; neither will you enjoy the blessings of each day if you are fearful.

The man who is looking for trouble usually doesn't have to step out of his tracks to find it. Trouble is the fleetest thing that flies and makes a "bee line" for anyone who calls it.

The trouble borrower is generally overstocked. He goes on making new loans all the time, but nobody ever bankrupts the Trouble Bank.

FINAL PLANS OF HIGH SCHOOL

Board of Education Give Approval of Specifications—Expect to Have Building Ready for Use by September

The board of education members assembled on Friday night to meet Gouinlock and make a final revision of the new high school plans. Nothing was done in the way of changes except for a few minor matters affecting local conditions, and the plans and specifications as adopted at the meeting will be ready this week when tenders will immediately be called for.

When the close proximity of the school to railroad sidings, the comparatively short haul for stone, sand and brick, and the ease with which the excavation can be made, are taken into consideration, with reasonable weather and a good contractor the building should be in such shape by the end of the summer holidays that classes can be started.

EVERY EVIDENCE THAT BUSINESS IS IMPROVING

BERRY BOXES; FRUIT CRATES

E. S. Johnson's New Factory on Elizabeth Street Prepared to Turn Out Large Quantity This Season—Modern Methods in Fruit Industry

Modern packing and shipping methods for the fruit industry are coming to the front rapidly, and along with the new sizes of Government regulated berry boxes is making the manufacture of fruit boxes and crates a big industry in Grimsby. And especially is the box packing being looked after by E. S. Johnson, on Elizabeth street. This business, started by J. W. Dalton and purchased last year by Mr. Johnson, has in the past decade grown to an extent that would surprise any but those closely familiar with the fruit industry.

The original factory had long since outgrown its capacity and frequent additions made, but this year it was found necessary to again extend to an entirely new concrete-floored building 40 by 40 feet was erected some distance from the old factory which is now used exclusively for storage.

Among the products of this plant are peach boxes 4 x 11 x 18 inches, and 4 1/2 x 11 x 18; pear boxes 3 1/2 x 11 1/2 x 20; apple boxes 10 1/2 x 11 1/2 x 20; (outside measurements) all government standard; lettuce crates, green-house flats, carrying flats; cases for holding four 4-10, tin-top containers for plants, tomatoes, grapes, etc.; 27-quart and 34 and 36-pint crates.

It has been found that the government standard quart berry boxes are a little too large for the nice carrying of raspberries so the majority of the orders for raspberries are plants, though the quart is preferable for all else.

Another product of some import is a standard bushel box for the orchard, tomato patch, potato field, etc. The box has 1-1/2 inch ends and contains 22 1/2 bushels.

One of the improvements which will appear this season is the fastening of the cover of the 24, 27 and 36 box crates. Formerly these have been closed by a strip of tin that was turned on a swivel tack and inserted into the side.

This new system, used away with the easily broken or bent tin tongue, and uses a strip of wood which reaches across the top catching under both cleats and may be tacked if crates are to be handled very much.

As there are many hundreds of old styles still in use, growers that would be a loss under the new ruling and the new shape boxes, a schedule has been devised by Mr. Johnson by which some 240,000 specially constructed boxes with straight sides, have been put in stock. These are available in boxes used on the west coast, and the number stocked should take care of several thousand old style crates.

The new pint and quart boxes are put up nests of 250 quarts and 500 pints and each bundle is well and securely wrapped in heavy paper so that they may be stored for an indefinite time and yet have the fresh appearance when used.

RURAL SCHOOL BEAUTIFYING

Horticultural Council at Ottawa Offers Nine Silver Cups for Competition—One Awarded to Each Province

The following announcement from Ottawa should develop a keen rivalry in hundreds of rural schools throughout Canada. Full information may be obtained from the Secretary, the Canadian Horticultural Council, Department of Agriculture, Ottawa.

"A competition in the ornamental planting of rural school grounds is being inaugurated by the Canadian Horticultural Council. The purpose of the competition is to encourage the planting of such ornamental and berry shrubs as will not suffer for lack of attention during the vacation period. The advantages of native shrubbery available locally in many parts of the Dominion and the fine things, equally hardy, obtainable from the nurserymen, give encouragement to the Council in the promise of a charming transformation in the rural school grounds of the country.

The competition, through Dominion-wide, divided Provincially. Nine have been secured for each Province, to be rural schools accomplishing the greatest degree of beautification in its grounds during the year. The cup will be the property of the school winning three times, not necessarily in succession. With each cup the Council will also give an award of merit certificate, which may be framed and kept by the school as a permanent record.

BORN

JOHNSON On Tuesday, April 7, 1925, at Grimsby, Ontario, to Major and Mrs. W. Johnson, a son (Charles) McGrimmon.

METAL CRAFT ALTERATIONS

Large Additions Being Made to Main Factory—Other Buildings Being Changed to Meet Demands

That business is on the increase is told daily in reports of the factory opening up of being on larger staffs.

Locally this upward trend is well shown by the fact that the Metal Craft Limited, is making extensive additions and alterations to the plant on Depot street. The main building which has served for more than half a dozen years has been extended at the rear by adding 24 feet east across the 65 feet and 24 inch pipe and six cast-iron furnaces.

This 24-foot addition is not been reared to the full height of the old building, but as a "saw-tooth" roof which is of several rows of windows and with the regular windows on either end the lighting is practically outdoor daylight.

None of the machinery on the first floor of the old building will be used but the new plant will be used as most exclusively for the assembling of the new Walker-Hopkins-Hopkins Hospital bed orders, which are such that this 1400 feet space will be required for this purpose alone.

The two other buildings at the rear, the machine shop and the store room, 20 x 40 feet, will be raised from their present level and brought up so that the floor will be even with the main factory.

The painting department and enamelling ovens will be moved from the second floor of the main factory into a new building to be used as a machine shop, while the machine shop will be moved into the building which has been used for storage. This will give plenty of room on the second floor for the storage of some stock, though storage space is being conserved as the plant is being expanded, leaving no accumulation of stock.

Adam McGregor has had charge of constructing the new addition and making the alterations to the other buildings.

BIG BOOZE HAUL MISSED BY "MAC"

Driver Deserts Truck and 228 Gallons of Alcohol Before He Reached Spot Where Grimsby Officer Was Waiting

Run-runners lost a valuable prize at Beamsville, when a truck, carrying 228 gallons of alcohol, was seized by the provincial police. At two-thirty last Wednesday morning, word was received by Provincial Constable Nelson, St. Catharines, that a truck had left Niagara Falls and was making for Toronto. An attempt was made to intercept the truck at St. Catharines, but the driver, who was also a constable, escaped.

The truck, which bore a To Ontario license number, was found to contain 228 gallons of alcohol. At the present price of 40 cents a gallon, the load was worth seven and eight hundred dollars.

According to the police, the alcohol was run over the border and repacked in Niagara for shipment to Toronto. The truck was wrapped in copies of a "Nagasaki" paper. No arrests have yet been made in connection with the shipment, but efforts are being made to trace the owner of the truck.

Provincial Constable McKay was also notified of the shipment, and he and Motorcycle Officer Walker were laying in wait for the truck along the Highway but it never got as far as their ambush.

WHAT DOES A PRINTER REALLY SELL?

When you place an order for printing, you are not making a purchase, but hiring a service. You employ the printer's organization to the extent required for the delivery of the job.

What do you get?

That depends upon whom you hire. When you employ a salesman, you ask how old he is, married or single, where he lives, how much experience he has, and what kind of church and lodge affiliations, when he graduated, and a lot of other things. All this time you are looking him over to see if he is a good dependable fellow. You are all these things and more if you are careful and scientific in your selection of employees.

Now you don't hire printing—you hire it. Printing can't be good without equipment, experience, intelligence, judgment, sound business policies, good business health and integrity in the organization. Take these things into consideration when you hire your printing.

SMITHVILLE SUFFERS DISASTROUS BLAZE

HAPPINESS HABIT

Money may make the world go round, but it never guaranteed smiles for anyone. Fewer hardships and more pleasures do not necessarily mean more contented people. Happiness is somewhere in the heart.

Always looking for the joys of life will keep one from getting many a jar that would otherwise bring annoyance. Fretting will wear you out, but the smiling spirit is a tonic.

There's a gloomy side to every picture. If you like it, look at it. But if you don't, cheer up and fill your mind with the things you want to see.

Not only has business been steady but is now on the increase so that sixteen men have been working five days a week since the first of the year. Nine of these sixteen are moulder and while speaking of the moulder it is in place to mention that each and every casting turned out is "tumbled" and cleaned, whereas most furnace fire pots and inside castings are not so treated. This shop also does a lot of custom casting for other industries in Grimsby—the Canadian Radiant Electric; Brock Snider Mfg. Co.; Metal Craft.

The machine shop and erecting floor in the main building is likewise about up to capacity and six cast-iron furnaces a day are being turned out.

Furnaces is the only line this firm is building, and but four patterns are made—or rather two patterns in each of two sizes, 20 and 24 inch, pipe and pipeless "modern" hot air furnaces.

The second floor of the main building is occupied by the box and crate making machinery and lumber, a large box of fixtures being a complement

Facts and Fancies

Two For One—

Well! The 4.4 Beer Amendment to the O.T.A. has passed the Legislature—what do I care? I have lived nine years without beer and I can live nine years more without it.

Raney says that two glasses of 4.4 will make you just as drunk as one glass of 8.8. Raney should not of given that fact away—there will be so many who will be trying the two-glass system.

That reminds me of the man who tried to make me believe that if a man drank enough 2½ per cent. beer it would make him drunk. He said that if six glasses of real beer would make a man drunk then 2½ times six or fifteen glasses of the 2½ beer would make a man drunk. He tried it and found out that he was wrong, but not I.

He will be lots of who will try to prove that Raney is right.

Bring Them All Over—

It is stated in the papers that a lot of people are flocking from Detroit to Windsor and other points along the Canadian border and are building, buying and renting cottages in order to sit under their own vine and fig tree and drink 4.4 beer. If that is so, how would it do to make the beer 8.8 and pull the whole city of Detroit over to Canada.

William Tell and Captain Kidd—

Along comes a writer and says that William Tell never shot an apple off his son's head. That the story is a myth. I don't believe it! I have pinned my faith to William Tell since childhood and I am going to stick to him to the end.

The same fellow is trying to make out that Captain Kidd was not a pirate. Nonsense! Sure, Captain Kidd was a pirate. If Captain Kidd wasn't a pirate then I'm a Dutchman.

The next thing they will be telling us is that there never was such men as Jesse James or John L. Sullivan, or Pierpont Morgan, or Billy Patterson. Rob history of these conspicuous characters and our literary life would not be worth living.

Boycott the Beer Grocer—

A preacher in Toronto the other Sunday suggested that the people should "boycott" a grocer who sold beer. Tut, tut! That "boycott" idea is old stuff. If I boycotted everybody who holds different opinions to what I do, I would have gone hungry and naked long ago.

Supposing one part of the Presbyterian church people "boycotted" the other part, what a nice Presbyterian world we would have—or supposing the Methodist church people "boycotted" the anti-union Presbyterian people, what a nice situation we would have.

Or to go further, suppose the Grits "boycotted" the Tories and the Tories "boycotted" the Progressives and the Progressives "boycotted" the Labor party, what a lovely little Sunday school of a world we would have.

That "boycott" stuff has been tried a few few times in this old world and every time it has proven a failure. Would it not be better to preach the golden rule and let the boycott idea go hang? I have had a thousand chances to do men an ill-turn, yet I have trained myself to do them a good turn, with the result that I am far happier than lots of people who profess to be far better than I am.

Wheat Speculation—

As an example of "what fools we mortals be"

take wheat for instance: In 1924 it was 98 cents a bushel; January, 1925, it went up to \$2.20 per bushel; in April, 1925, it fell to \$1.42 per bushel.

There was no sound business reason for wheat going to \$2.20 per bushel. It was pure speculation and manipulation; nor was there any sound business reason for it tumbling to \$1.42—the one was the "bulls" riding for a fall; the other the "bears" riding for a tumble.

There was probably sound business reasons for wheat going to \$1.75 per bushel and staying there, but speculators drove it so high that Europe stopped buying and then it had to fall and fall away below its value.

Death Knell of Jury System—

Twice in the last month have two juries in the city of Hamilton, driven what I would think, should be the last nail in the coffin of the jury system.

In one case three men maltreated a girl on the road side in the dead of the night—the jury set them free. In the other, four foreigners upon the charges of being accessories after the fact of the murder of a man, were set free. If I were the police force of Hamilton I would try and "bust" the jury system. No police force can maintain a high order of efficiency if all their efforts to convict criminals are thrown to the winds by careless or culpable juries.

NOTES AND COMMENTS ON CURRENT EVENTS

BY PETER PETERKIN

The following indictment of organized labor and of the consuming public taken from an article which appeared long ago in the Morning Post, of London, England, applies to a considerable extent to this country as well:

"By producing commodities for sale this nation—Great Britain—lives; it can live no other way; if this, its main business, fails it must starve. Our producing industries, therefore, are the very life of the nation, and we should cherish them as the apple of our eye. But, if organized labor on the one side persecutes them, and, on the other, the consuming public refuses to make any sacrifice in their support, how can we expect them to flourish? The nation which refuses to make any sacrifice may end by losing all."

"If we are to continue as an industrial nation we must change our point of view. We have cherished the idea of the sanctity of the producer, the man employed without respect to the employer. Our manufacturers are expected to bear everything and receive nothing."

"They are denied the protection which their rivals of every other nation obtain, and they are loaded with burdens which none of their rivals have to bear. It is an unreasonable and even an impossible point of view. No nation can thrive, or even live, which persecutes and penalizes its industries." Does not this apply almost equally well to Canada under our present Dominion government?

An extraordinary example of fanaticism was that provided by the Rev. A. E. Baker, of North Earlscourt Methodist Church, Toronto, who, on March 22nd last, forbade his congregation and all Christians to sell or handle the "deadly beer" which the Provincial government is about to permit to be sold throughout the province. This (Rev.) Mr. Baker even went so far as to urge all householders to boycott any grocery that handled the new beverage.

It is not too much to say that such intemperate statements do far more harm to the cause of true temperance than can come from any other source, for to fair-minded people the absurdity of them, "Deadly beer" is good. This Rev. individual does not seem to understand that an ordinary person would have to drink about half a barrel of 4.4 beer before it would have any effect upon him in the direction of intoxication, and long before that a stomach would rebel.

Worse than all, such outrageous statements made from the pulpit of a Christian church have the tendency to expose the Christian religion itself to contempt, especially amongst people already inclined that way. Contrast the following statement made by several Canadian citizens, recently returned from taking a post-graduate course in Italy, with that of Rev. Mr. Baker.

"In a city of over 200,000 population we never saw a native Italian drunk, whereas we saw many English-speaking people drunk. Now, why the difference? To us it seemed that one reason was that the Italians drank their own mild native wine, and the English-speaking people drank "spirits," as they called whiskey and such strong drinks."

In Italy, too, they destroyed all adulterated wines and other adulterated liquors offered for sale, and it seemed to us that our government should adopt that or similar measures against the poisonous concoctions made and offered for sale in this country."

A former correspondent of the Financial Post, who now resides in Los Angeles, has some interesting revelations to make as to the operations of real estate unloaders and describes the extraordinary methods resorted to in selling real estate there. He says that the only way in which the operation is planned for "hooking the sucker" is to make an eye-opener to many Canadians.

"A woman came to the door, asking you to be the guest of some sub-division promoter. She handed you a card. From this you see that they will call for you at your door with a good car, take you for a drive through the parts of the city best suited to give you an idea as to the buildings, and take you for a boat ride on the harbor, with a good speller to tell you about it. Possibly there will be fifty or more in the party."

Then you are given a good lunch, all free, and you take your seat in the auditorium; you listen for an hour to one of the best speakers that can be had, telling of those that bought and made their thousands, and of those who did not buy and of the immense losses they sustained by not doing so. This appeal would bring almost anyone to the buying point, the picture is so beautiful.

Then you are taken out on the land for sale and as there are about 20 tents with tables and chairs in them to accommodate the salesmen and the party of say, two or three, whom each is handling, you are brought face to face with the most urgent appeal you ever heard. If you do not buy, they will let you alone after that except that they will take you home and be as polite as anyone can be. You are told that under any and all circumstances you are under no obligation to them.

The woman who comes to your home gets \$100 for every one she gets to go. This scheme is used instead of advertising. It works. I have been on 2 or 3 trips just to size up the situation. I think it is cruel. So many people face the arguments of these high-binders and buy when they really know they cannot pay. This man says that more than half the lots are sold to women by the methods described to get them out. And they talk from \$25 to \$100 out of them, get them stuck, and then their husbands have to meet the rest. Land pirates of the best!

P.R. Annual Report, Guide to Canadian Development

Is a clearly understandable presentation of conditions since it affects all phases Canada's industrial and commercial life

Every year the people of Canada have placed before them two documents which in a different way present the facts regarding conditions prevailing throughout the country. One of these is the budget of the Minister of Finance and the other is the annual report of the Canadian Pacific Steamship Company.

The latter being a business document and necessarily entirely free from any influence of political considerations, is a more reliable guide because there exists a phase of Canada's industrial and commercial life which is not touched upon and affected by the truly national institution of which it is an annual record.

The company's report for the year just issued, reflects the marked contraction of the business has experienced. Gross earnings for 1924, \$13,334,500, a decline of \$1,334,500 from those of the previous year. Freight earnings alone decreased to \$10,794,416. Working expenses, including all taxes totalled \$145,274,916, a decrease of \$13,083,165. Net earnings totalled \$37,227,241, a decrease for the year of \$2,617,768. The working expenses for the year, including all taxes, amount to 79.66 per cent of the gross earnings, and the net earnings to 20.40 per cent, as compared with 80.86 per cent and 19.14 per cent respectively in 1923.

In his summary to the annual report Chairman and President E. W. Beatty points out that the decrease in freight earnings, which alone amounted to \$10,794,416, is largely accounted for by the much smaller movement of grain and flour, particularly the former, owing to the smaller crop in Western Canada. He instances also a substantial decrease in the movement of manufactured articles as a result of the general business situation. Notwithstanding this, he says, the result of the company's operations must be considered satisfactory.

Mr. Beatty pointed out that the company's total sales for the year totalled over \$100,000,000, of which \$7,421

acres were of irrigated land selling at \$53.26 per acre, the average for the balance being \$15.99 per acre. The land sales were in excess of last year, but were still of moderate proportions, due partly to the fact that immigration was not extensive, especially of those financially able to immediately purchase land holdings.

The wide-spread character of the company's operations, said the report, makes it necessary that substantial cash balances should be maintained and for that purpose the directors had authorized and maintained the creation and sale of securities totalling \$52,000,000. Special attention was drawn to decrease in the company's income from subsidiary companies, particularly the Canadian Pacific Steamship Company operating on the Atlantic where continued light freight business and smaller passenger traffic cut into earnings. Results in this connection were disappointing, says the report. In anticipation of a considerable increase in passenger and freight traffic the schedules for the season were arranged to provide for ten additional sailings during the St. Lawrence season. The schedules of sailings of other companies were also enlarged with the result that competition was increased, and this added the drastic immigration laws of the United States, together with the failure of Canadian immigration to reach the proportions expected by the Government and the transportation companies, were the principal causes of the unsatisfactory showing.

The steamship companies, in order to assist in making effective the immigration policy of the country, allowed a rebate of fifteen dollars in the fare of each immigrant, but, notwithstanding this concession, the decrease in the class westbound passengers was 15,000 and the cost to the Company of the rebates is \$225,000, with a corresponding reduction in its net earnings. The total earnings westbound were \$1,743,000 less than in 1923. The eastbound passenger carryings were somewhat greater than in 1923, owing largely to the attraction of the Wembley Exhibition. Freight traffic showed a very moderate increase, amounting in earnings to \$605,000 and in tonnage to 125,000 tons. In the result, the operations of the Atlantic fleet showed a decrease in revenue from all sources of \$1,979,000 in 1923 and an increase of \$617,000 in expenses owing to the increased number of voyages. An improvement in business to and from the Orient is expected because of the more stable commercial and political con-

ditions now existing in these countries.

The report drew attention to the two fine new steamers, the "Princess Kathleen" and the "Princess Marguerite" which have been built for the British Columbia Coast steamship service, both of which will be operating in a few weeks and to the satisfactory progress on the work of building the new Lake Louise Hotel which will open in June as one of America's finest hotels.

During the year the company proposes to spend a total of \$4,558,000 on improvement to plant connected with railroad and telegraph services. It was pointed out that during 1924 branch line construction in the Western provinces was proceeded with, 227 miles of railway being graded and 214 miles of track being laid. Moderate extensions will be built during the coming year, a total of 170 miles of branch lines being proposed.

The report concludes with an important observation on the freight rate situation in which it is pointed out that the recent decision of the courts naturally creates violent inequalities and discriminations between communities. Undoubtedly intervention by Parliament will be necessary in order that a state of free from such discrimination, even though legal in character. The remedies which are suggested are for the most part artificial and of doubtful soundness. A general lower scale of rates is not possible without grave consequences to the transportation companies unless brought about through increase of traffic in consequence of greater population and development in the country itself. Two factors, however, appear to be reasonably certain, namely, that an independent tribunal free from political influence should determine the reasonableness of Canadian railway rates and that the Companies should receive adequate revenues for the vitally important services they render. The complicated question of freight schedules is one which can only be dealt with by a dispassionate tribunal with the aid of experts and having in view the interests of the shippers and consumers, and of the transportation agencies of the country. In public discussion of the subject the value of the work of the transportation companies and the particular of your Company is frequently recognized, but the fact that that work can only be carried on successfully under a fair scale of rates is sometimes overlooked.

Letters To The Editor

"ARRESTED"

Hamilton, Ont.
April 1st, 1925.

To the Editor:

Dear Sir:

His positive fire-proofing and heat conserving qualities, make it indispensable for many uses, which are constantly increasing.

Last year we exported about \$9,000,000 worth (the trade report doesn't seem to give raw and manufactured separate), but I understand it is largely raw.

With Canada possessing 85 per cent. of the world's known supply, why should Canadian labor convert it into finished and useful products.

Why not an embargo or export duty, upon its raw and partly-finished products.

Neither weather or insects, or moth or rust will corrupt, (but we cannot complete the biblical sentence) because exporting raw material of this nature, seems like approaching legalized stealing the Canadian workmen's wages, and giving them to foreign workmen in other countries, without any recompense whatever.

It should and must provide work or taxes, I prefer the work.

Yours truly,
W. O. SEALEY.

RAILWAYS AND WATERWAYS

To the Editor: Why not put our Canadian National railways on the same basis as our Canadian National waterways?

Our government provides the road bed and upkeep of same, for water transportation, including canals, harbors, light-houses, buoys, signals, dredge-grading, locks, terminals, etc., the water-borne traffic, only paying for the use of the freight and passenger carriers and their operating expenses.

Why not write on the cost of railway road bed, bridge, etc. as well as terminals and locks, which would reduce the cost of freight, upkeep, etc., to the railway traffic on half or more? Then we could get Alberta coal to Ontario for \$2 or less, and Nova Scotia coal at \$2 without asking any favor. We would then get fair competition between our inland water and rail transportation.

This would build up a mighty inter-provincial trade, so badly needed. Attention to our distant and foreign trade is all-important, of course, but why neglect our inter-provincial trade almost entirely for the more distant and perhaps less profitable trade?

Canada possesses more fruit and many other articles, than is consumed by the whole of Canada, an exportation, such and such, is so expensive that we lose half of it, for foreign products.

W. O. SEALEY.

Hamilton, Ont. March 31, 1925.

WE DO GOOD PRINTING

FAVORITE HYMNS AND THEIR WRITERS By Rev. Archer Wallace

"O LOVE, THAT WILT NOT LET ME GO"

Hamilton, Ont.
April 2nd, 1925.

To the Editor:

Dear Sir:

When George Matheson the Scotch author of the hymn, "O Love that Wilt not let Me Go" was only eighteen months old his mother made the melancholy discovery that his eyesight was very bad. He was taken to an oculist, who said that he was suffering from inflammation of the eyes, but he seemed to think that with careful attention, young George might overcome his handicap. His eyesight became gradually worse and it was a very severe shock to the bright lad when he had to retire from most of the games that his chums delighted in.

During the summer he often spent his holidays on the Pith of Clyde. Everybody seemed to like him, with his kind heart; and the fact that his eyesight was so poor made people more than usually courteous. What he loved to do more than anything else was to stand on the pier and watch the boats come in, constantly trying his power of vision, hoping that his eyes were improving. Sometimes, with the same idea in his mind, he would walk along the city streets and try to make out the names over the store windows, but as a rule he received little encouragement, for his eyesight was gradually getting worse. Soon he found himself unable to tell the number of funnels the vessels had, as they sailed past the pier, and he could not make out the names over the store windows. Then he bravely faced the knowledge that in a short time he would not be able to see at all.

Matheson was about eighteen when he became practically blind. He was never what could be called totally blind, in that he could notice the passing of shadows, and whether or not the day was bright, but for any other purpose his sight was gone. This severe handicap did not discourage him in the service in which he presided, and the books he wrote, he displayed wonderful cheerfulness and good spirits. When he became a minister, he used to commit the numbers of hymns and the lessons to memory, and then face the congregation as though nothing were wrong. When he recited the lesson he would look down at the open Bible before him, just as though he could see. When someone asked him why he did that, he said it was because he wanted the people to think of the lesson he was repeating, and not of him and his blindness.

In spite of his disability, he was remarkably well at school and a college. He was a keen student and by the time he was fifteen he had read for Glasgow University. When he took his place with other students in the university, many pitied him and thought that he would never be able to keep up with the others who had possession of their eyesight, but George Matheson amazed them by taking a very high standing throughout the course, and by carrying off many of the prizes.

He wrote many hymns and poems, the best known of which are: "O Love, that Wilt not let Me Go." He was

sitting at home on the evening of June 8, 1885, when suddenly it seemed to him as though an inward voice were dictating the hymn. He said afterwards that the whole hymn was written in less than five minutes, and that it never received any retouching or correction. It came to him as an inspiration, and he set it down at once. In view of his blindness there is unusual pathos in the last stanza:

"O Joy, that seekest me through pain,
I cannot close my heart to Thee;
I trace the rainbow through the rain,
And feel the promise is not vain
That morn shall tearless be."

WHEAT AND COAL

Hamilton, Ont.
April 2nd, 1925.

To the Editor:

Dear Sir:

Canada's increase of duty on slack bituminous coal, was met by the U. S. transportation Companies the next day.

Why not adjust Canada's transportation rates, so as to supply Canada's needs, with her own coal at least. Whether we export much or not and avoid sending \$100,000,000.00 of our own good money away after it?

The U. S. duty on Canadian Wheat has now been in effect about two years or more, and we have not met it yet. Why not an export duty of say .30c and the United States will meet this immediately, by reducing theirs to that extent.

Why not Canada have the \$30,000,000.00 and the United States \$20,000,000.00 in coal and the United States having it all?

Canada produces the Wheat, and is entitled to the whole value of it. Yours truly,
W. O. SEALEY.

TAKE NOTICE

TAKE NOTICE that a special Court of Revision, re Livingston Avenue, will be held on the 22nd day of April, 1925, in the Court of Revision, at the Town of Grimsby, at 3 o'clock a.m., for the purpose of hearing complaints against the proposed amendments, alterations, and changes of the zoning by-law, and which, by law, can be made by the Council.

W. F. RANDALL
Clerk of the Municipality of the Town of Grimsby.

PUBLIC NOTICE

The Public Health Act requires that all wells, public or private, the water from which is used for domestic purposes or for watering cattle, must be thoroughly disinfected every year before the first day of July. A certificate to the effect that the well has been disinfected must be filed up at the expense of the owner or occupant of the premises.

Old wells shall not be used as a privy, privy vault, or cesspool.

No person shall offer for sale as food any diseased animal, or any meat, fish, fruit, vegetables, milk, or other article of food which by reason of disease, contamination, impurity or other cause is unfit for use.

R. A. ALEXANDER, M.D.
Medical Officer of Health.

MAINLY FOR WOMEN

Absorbent Cotton

A Household Necessity

In this age of preventive medicine, when practically all scientific bodies are engaged in popularizing the knowledge of hygiene and sanitation, it is surprising to find so many households unacquainted with the uses and advantages of absorbent cotton. When the physician is called to an emergency case in these homes, he must, as a rule, be satisfied with makeshift dressings, usually some old linen kept in a drawer especially for such an emergency. Druggists should make it a habit to educate their customers on the use of Absorbent Cotton and surgical dressings, showing them the advantages they possess, their small cost, and telling them why they should always have a small supply in their homes so as to be prepared in case of emergency.

So numerous are the uses of absorbent cotton as a preventive of infection in troubles of the skin, that it is truly strange that doctors and pharmacists do not insist more generally on the necessity of absorbent cotton being kept in every household. The question of cost enters little into consideration, as small rolls of this cotton can be procured at any drug store at prices ranging from 5c. upwards.

There is hardly one woman doing her own cooking who has not at some time or other burned her hands more or less severely while busy at her kitchen range. In such cases absorbent cotton is not only useful in absorbing the serum from the vesicles that are present in severe burns, but, if saturated with picric acid or even bicarbonate of soda and applied on the burnt surface, it will immediately alleviate pain. It does not adhere to raw surfaces and should be used as a dressing, as it will exclude air, thus favoring the healing of the skin and acting as a screen through which germs cannot pass. When any old piece of convenient fabric is used there is always danger of infection.

When anybody in the home is suffering from one of the many little ills flesh is heir to such as tooth-ache, ear-ache, pains in the side, etc., the average woman will not call a doctor; she usually has some favorite family remedy for just such cases. Nothing is better than absorbent cotton when applying poultices, moist dressings, or medicaments to any part of the body, because it preserves heat and prevents the rapid evaporation of volatile drugs, thus enhancing their curative properties.

After a porous or any form of adhesive plaster has been used, absorbent cotton should be applied to the inflamed surface to allay irritation and to prevent the clinging of underclothing. When salves and ointments are being applied to the skin, as in skin diseases, it is always preferable to use absorbent cotton as the applicator. There is always danger of infection when the fingers are used, as the hands are never aseptic, even when perfectly washed.

Relief from ear-ache is quickly obtained by inserting in the orifice a small plug of absorbent cotton dipped in warm oil. When an abscess is present, a small piece of absorbent cotton will not only absorb suppuration but prevent air from causing inflammation.

In cases of profuse bleeding of the nose, or any form of hemorrhage, the use of absorbent cotton is indispensable, as it quickly absorbs and stops the flow of blood.

In infantile hygiene it is invaluable. Many mothers find its use preferable to ordinary sponges when bathing babies, as it is softer and does not irritate the skin; as a powder duster it is more hygienic than the ordinary powder-puff. Wrapped around a tooth-pick, it should also be used to clean babies' nostrils, ears and nails. It is by far the best material to use in cleaning children's teeth until they are old enough to use tooth-brushes.

Many thoughtful mothers pad baby baskets and cribs with absorbent cotton; use it as small pillows and as padding in the bed, noting that it absorbs all moisture and prevents the soiling of bed-clothes.

Inside of babies' napkins the use of absorbent cotton is also urged, as it prevents irritation and incidentally saves washing. It can be destroyed when soiled.

Absorbent cotton is used to advantage in covering bottles containing prepared foods for infants; for corking milk bottles and for filtering babies' food and milk.

In the experience of all mothers it has often happened that when baby awakes in the middle of the night and cries for milk, it was found that the hole in the nipple of the feeding bottle was too large and allowed too much liquid to flow. In such cases the immediate procuring of another nipple is out of the question. Nothing is simpler than placing a piece of absorbent cotton in the nipple from the bottle end, thus allowing the fluid to flow gradually. In such cases a fresh piece of cotton must be used at each feeding. The difficulty of medicating children has been experienced by all mothers. Here absorbent cotton can be used to advantage.

When an analysis of urine is considered necessary by the family physician, it is an easy matter to obtain urine by placing a pad of absorbent cotton in the crib or napkin, afterwards a simple squeeze of the cotton will yield sufficient urine, filtered and ready for analysis.

A jacket of absorbent cotton is the very best heat-preserver that can possibly be used for children in the treatment of bronchitis-pneumonia and other affections of the respiratory organs.

Later, when the child's teething begins, the doctor will find a valuable adjunct in covering the entire blade of the bistouri except the small point

MISTAKES OF IMPOSSIBLE

Even Skilled Hostesses Make Them—With Constant Fooling She May Reduce the Probability of Recurrence, and So Achieve a Well-Ordered Home.

Does the thought of company give you a thrill of glad anticipation, or does it send a shiver of apprehension down your spine? Arise happily confident, that everything will go off all right, or are you wondering if everything will go wrong as it did last time you attempted to entertain?

I know a young housekeeper who will not soon forget her first experience at entertaining. "Thanksgiving, too, and the guests were the father and mother of my only son—her husband."

She wanted so much to have a nice dinner, perfectly cooked and served. Above all, she wanted to show them that she could competently care for their treasures—hers now.

She had no maid, but with the help of Maggie-by-the-way, she attempted what seemed to her a very easy dinner. But, alas!

When the tureen of maitre blanc was set before her and she lifted the cover she found that it was perfect when she finished it—had curdled. The in-laws said it didn't matter—that they did not care for tomatoes anyway. But Bob, blushing valiantly, consumed a plateful of the curdled mixture—for her sake, she was sure of that.

The oyster pie was excellent—at least she had that to be credit, she reflected. The turkey was browned to a turn and looked as a roast turkey should look. But when she started to carve, it was soon evident that only the outside and the white meat were thoroughly cooked. And the in-laws did not care for white meat!

The turkey was removed to the kitchen, dissected, and the pieces cooked in a frying-pan and they were done. The gravy was heated and poured over. It was partaken of sparingly. The vegetable kept hot in the warming oven and cried and lost their flavor, and the pumpkin pie, which had been a work of art, came in looking as if the birds had pecked at it, because Maggie-by-the-way tried to warm it, turned it all over the top, then tried to remove the damage. The coffee was served lukewarm, too—but by that time the little bride was in a state of apathy, and nothing really mattered. It was a long time before she could believe that life was worth living in a country where Thanksgiving was an annual festival.

Of course, accidents like this happen in any household, but nowhere is it as dreadful as in the home of a new housekeeper, and this story is no exaggeration, but is sadly, tragically true.

The first lesson every housekeeper should learn is not to attempt too much for company, and that it is wisest to keep along familiar ways. And don't make the mistake of thinking that you can't entertain prettily without extravagance. If you have little money and no maid, you must make up these deficiencies by thought and effort.

Take the matter of dinner-making, for instance. A dinner may be as much or as little as one chooses. An elaborate affair of many courses is a heavy pull on any but a well-trained pocket, and hard on any housewife who has not competent servants.

Yet such a feast may be no more delightful than a meal that will begin with oysters or an inexpensive appetizer, go on with a good soup, a well-cooked roast, a couple of vegetables, a simple salad, and end up with a light dessert and coffee.

If it seems best, an entrée may be introduced, or celery, crackers and cheese may be served after the coffee.

RENOVATING WINDOW SHADES

Have you ever turned soiled window shades bottom end up? Usually only the lower half of a shade becomes soiled. Remove the plug and stick and cut off any of the shade on either bottom or top unless it is very much torn or soiled for it does not show when the curtain is put up again. If the top is torn or marked by the tacks, cut off a couple of inches. In the top end sew a hem by machine after removing the tacks, and one must be careful not to remove the tack which holds the spring in the end of the roller. Also, in taking shade on roller again, be sure spring and is on left of inside of shade. Put the hem in before you tack the shade on the roller. It is much easier to handle than the soiled lower part rolled in during the day is not seen, and during the evening is hardly detected when the shades are lowered.

needed in tacking roller teeth or gum.

As there are hundreds of uses of absorbent cotton in the nursery, as a house where children are being brought up should, at any time, be without a roll or two of absorbent cotton. (Medical).

FACTS ABOUT TEA SEPILS—No. 2

Tea Production Today

If the Chinese, who first discovered tea, had realized the possibilities of the trade and had studied the nature and requirements of the plant, China might still be the largest tea producing country. Centuries of neglect, however, stunted the growth and caused the quality to deteriorate. In the mountains of Ceylon and India, tea was found to flourish. Scientific methods of cultivation and manufacture were introduced with remarkable results. Now, the finest tea grown in the world and by far the largest quantity comes from these countries. "SALADA" is mainly blended from flavoury India and Ceylon teas.

Thursday, to form a Grimsby branch of the Canadian League of Nations Society, the managers of the local banks have kindly consented to allow membership fees to be payable at the banks. Membership of the society is divided into four classes: (1) Associate Membership, \$1.00 a year; (2) Ordinary Membership, \$2.50 a year; (3) Family Membership, \$5.00 a year; (4) Church, Societies, etc., \$10.00 a year. Membership includes literature. "Your joining the League of Nations Society will help this world movement by giving it (1) Moral Assistance by

adding one more mind and personality to that mighty force known as "public opinion". (2) Financial Assistance by giving your bit towards the funds necessary to keep all persons posted on what the League has done, is doing, and is trying to do."

THE NIAGARA DISTRICT GRAPE GROWERS LIMITED SUSPEND OPERATIONS.

At a meeting of the Directors of The Limited, held last night it was decided to suspend operations at once. This decision was brought about on account of the decision of J. A. Willis, of Jordan, refusing to co-operate with other dealers, and co-operative companies in an arrangement for a uniform price on Grapes. The suspension of the Grape company will cause a tremendous loss to the Grape growers of the district.

FAST SERVICE BY TELEPHONE

The other night The Independent had cause to call a certain party in Hamilton and according to the new instructions just issued by The Bell Telephone Co., we just rang the bell and when the sweet voiced operator on the other end said number we said Mountain 955 Hamilton, and within thirty seconds the Peoples Paper was in deep conversation with the party called.

It was fast service. Real service. At least five minutes if not ten ahead of the service handed out previous to April first. In fact it was a service equally as good in proportion as the home local service which is without a doubt the best service given anywhere in Canada by a small town telephone exchange.

There is a real newspaper story connected with this change in the local Hamilton service which unfortunately this paper is not at present allowed to print, for personal reasons, but at the same time, it is only due to an unfortunate circumstance that this present fast service was not put in effect some five years ago.

Grimsby people who wish to speak to a party in Hamilton, Beamsville or Vineland need not now ask for long distance. For instance, supposing "Jimmy" Farrell wants to talk to "Bill" Cosmos in Beamsville, instead of him asking for long distance and telling her that he wants "Bill" Cosmos at 806 Beamsville to which call she says "I'll call you", he simply lifts off the hook and says "806 Beamsville, please", that is providing he says please. Grimsby operator immediately calls Beamsville and quicker than two shakes of a dead lamb's tail, he is talking to "Bill". Under the old system he had to wait at least three minutes if not more.

The new system is a thousand times farther ahead of the old one and every user of a telephone should get posted on this fact as quickly as possible.

ST. JOHN'S CHURCH TENNIS CLUB HOLD MEETING.

The St. John's Church Tennis Club held its first annual meeting, Monday, April 6th, 1925.

It reports having had a very successful year. Organizing a year ago, with an asset outside of the goodwill of those interested; the courts having to be constructed, and expense of equipment to be borne; in its initial year the Financial Statement shows a substantial credit balance. It has constructed two fine courts, with a third nearing completion, which are a great asset to the sporting element of this community. Tennis is becoming more popular each year, as judged by the interest and enthusiasm shown, in new clubs being organized and courts constructed. St. John's Church Tennis Club looks forward to the approaching season, confident of still greater prosperity and success, than its creditable initial season.

The officers for 1925 were elected as follows:

Honorary: President, Major G. A. Ramsden.
Vice-President, Mr. David Allen.
Executive: President, Mr. Geo. A. Bromley; 1st Vice-President, Miss Doris Bromley; 2nd Vice-President, Mr. Chas. Robertson; Secretary-Treasurer, Mr. M. Cartner.

Committees: Grounds Convenor, Mr. L. A. Bromley; Membership Convenor, Mr. Geo. Kidd; Tournament Convenor, Mr. K. Baxter; Social Convenor, Miss B. Baxter; Reception Convenor, Mrs. P. S. Milliken.

GARBAGE DUMPING

The public is hereby warned that Garbage must not be put on the town dump. The Health Act says all garbage must be burned or buried or taken to places removed from dwellings. Anyone putting garbage on the town dump will be prosecuted. A tin can and other refuse must be taken to the Elizabeth street dump, and anyone leaving same on streets will be prosecuted, as this practice must be stopped.

Any information relating to parties violating these laws will be treated as confidential.

START TO SEED AT GUELPH O.A.C.

Spring seeding commenced on Friday, April 4, in the experimental plots of the Ontario Agricultural College, Guelph, 15 days earlier than last year, and the average "in the 37 years, 1888-1925, is, in the average date of sowing for spring wheat has been April 16, which coincided with that of 1924," reports Dr. C. A. Zavitz, head of the Department of Field Husbandry. "In only three of the 37 years have we been able to start sowing in March, and on March 26, 1910, March 27, 1902, and March 29, 19—while in some years it was not until the last week in April. The start in spring is, therefore, little behind the earliest, and well ahead of the average, which, in view of the generally heavier yield from early sowing, augurs well for this year's spring grain crop."—Toronto Globe.

G.V.V.A. EIGHT YEARS OF AGE

The members of the St. Catharines branch of the Great War Veterans' Association, along with all other branches in the Dominion will break away from their regulars to become assistance for the returned men on Wednesday, April 15, and celebrate the eighth birthday of the Association. It is being planned to make this the most important celebration the association has had since the association was formed eight years ago.

It was felt by the Dominion Command that more could be accomplished by making the birthday celebration a national wide, is planned to make it the matter of a friendly war to see which branch can put on the most novel and entertaining time. The local branch is planning to make the other branches stop some if they are going to beat them.

While things have not yet taken concrete form it is assured that the time will be something worth while. The general public will know that the returned men are still standing together as they did "over there." There will be no business transacted at the gathering but every person will start in to have a jolly good time.

LEAVE SPROUTS ON POTATOES

Seed potatoes placed on the barn floor in the latter part of May and allowed to remain there for three weeks, after which they were planted whole with the short sprouts attached, gave better results than tubers not so exposed in experiments at O. A. C. Seed kept in a dark cool cellar and carefully planted with the slender sprouts attached gave an average yield of nearly 25 bushels per acre more than similar seed from which the sprouts had been removed.

"These results go to show that seed potatoes from which sprouts have been removed in the spring before planting are considerably weakened for crop production," says a bulletin from the college. "They also show that if seed potatoes are allowed to sprout in the spring their value depends largely upon the conditions under which the sprouts are allowed to develop before planting. This seems to favor the practice of allowing potatoes to sprout under proper conditions in the spring not only to hasten the crop for early market, but also to furnish good yield of tubers."

VINEMOUNT CONCERT

The last Vinemount Community concert for this season was held in the school house there on Tuesday evening of last week with a large crowd present. Reeve Corman occupied the chair. Delightful vocal solos were given by Miss Grace Smith, late of Scotland; Miss G. Ormiston and Geo. Traxler, Stoney Creek. Mrs. Roy Lee, Miss Ptolemy and Miss Ormiston furnished some brilliant piano music. The comedy was given by Hugh Hildreth and his Tweedle, in a sketch entitled The Tax Collector; by J. J. Bertram, in descriptive reading entitled Sir James Lauder's Trip to Woodburn, and by James Patterson, in his comic songs and impersonations. A debate, "Resolved that discontent does more harm than overwork," between J. J. Bertram and N. C. Bardick, affirmative, and Madam Gladson and Little, negative, was closely contested. The judges, Mrs. W. Johnston, Miss G. Ormiston and Miss Hildreth, decided in favor of the affirmative by a small margin.

LOW-COST TRIP TO PACIFIC COAST

A captivating four-week tour of Western Canada and the Pacific Coast, with a trip through the United States on the return journey, is being planned for Canadian teachers and their friends this summer.

Those who take advantage of this trip will see the greatest scenery on the continent—the Buffalo herd at Wainwright; Jasper National Park with its unsurpassed mountain scenery; Mount Banff, the highest peak in the Canadian Rockies; the totipot of Kluang and the mystic beauty of the Peace River.

At Prince Rupert the party transfers from train to boat for the glorious water trip of 60 miles through the sheltered Soan Sea of the North Pacific Coast—Vancouver, Victoria and Seattle.

On the fifth trip five wonderful days will be spent touring Yellowstone National Park; motor, with a trip to the Grand Canyon, three days at Rocky Mountain National Park, Colorado. This is the Denali, Clear Creek Canyon, and the Springs of Lookout Mountain before heading for Chicago and Toronto.

The tour leaves Toronto July 9th and you can afford to miss it. Full information, etc., can be secured with illustrated booklet from A. E. Bryson, 41 Silverthorne Ave., Toronto. Mar. 4 Kerr, 4144 Ave., Hamilton, or any Canadian National Railways Agent.

"After taking Two bottles of my wife made rapid progress back to health"

Carnol is one of the finest remedies ever discovered for use by the expectant mother. There is no time in a woman's life when it is so vitally necessary to safeguard her health. She only should she protect her own health, at a most trying period, by the use of Carnol. Read what Carnol did for Mrs. Perry. "My wife, about two years ago, just before our baby was born, was suffering from anemia and indigestion. She could keep nothing on her stomach. We tried a great many so-called remedies, phosphates and even beef, from an old wine tonic, but to no effect. One day we went into one of our local drug stores, Crawford's, and asked him to give me a reliable tonic for my wife. He handed me a bottle of Carnol, recommending it highly, and told me to give it a fair trial. After taking two bottles my wife made rapid progress back to health. The colour came back to her cheeks and her appetite was completely restored. We find Carnol almost invaluable for our boy. It serves as a useful medicine, especially at teething time, and we are never without a bottle in the house. It gives me a great deal of pleasure to recommend the merit of Carnol. As a body-builder, nerve remedy and a wonderful tonic in all run down conditions, I don't think there is any medicine anywhere equal to Carnol."—Aldred Perry, 227-10th Street, Brandon, Manitoba. 5-24

WINE MAKERS PROTEST TAX

TORONTO, APRIL 6.—A deputation representing the Ontario Wine Manufacturers' Association saw Premier Ferguson this morning with respect to the tax of fifty cents a gallon to be placed on native wines in Ontario. The deputation, of which the spokesmen were W. M. Bright and J. Evans, St. Catharines, suggested that the tax be collected in the same manner as the federal government collects its taxes. This is by a monthly return made by the Wineries. The Premier suggested that they interview Hon. W. H. Price, Provincial Treasurer, with this suggestion. The deputation also asked that they be allowed to advertise the selling of beer in the same manner as the advertising of beer is allowed. The Premier declared himself unalterably opposed to this proposal. The Ontario Temperance Act states specially that native wines must not be advertised. It is hardly possible that the suggestion that the tax be collected in the same manner as the Federal Government collects will be accepted because that would make it an indirect tax which is not constitutional for a province.

ACROSS CANADA AND BACK \$225.00 A 21-DAY TOUR INCLUDING ALL EXPENSES.

Under the personal supervision of Professor Sinclair Laird, Dean of the School for Teachers, McDonald College, P. O. Quebec, a special train will leave Toronto Union Station, at 2:15 p.m. Monday, July 20th, 1925 en route to Victoria, via Canadian Pacific through Port Arthur, Fort William, Winnipeg, Regina, Moose Jaw, Calgary, Banff, Lake Louise and Vancouver, and thence by steamer across Puget Sound to Victoria, the famous Canadian resort.

The return trip will be via the Okanagan Valley, Nelson, Kootenay Lake, Windermere, Dunsmuir Camp, by motor from Windermere to Banff over 104-mile newly completed Banff-Windermere Highway with stops at Hadfield Hot Springs, Vermilion River and Storm Mountain, Dunsmuir Camp, with a full day at Banff, Poudre Canyon, Saseaton, and Devil's Gap, Dunsmuir Camp, Kenora. From Port William to Port McNicoll by the C. P. R. Great Lakes steamers and by rail to Toronto will complete this interesting and varied trip.

While appealing primarily to teachers, the tour is open to anyone desiring to go. The train will consist of the most modern equipment. The cost is for one person only occupying a lower berth. Proportionate fares from all points in Eastern Canada. The charge includes rail, steamer and sleeping car fares, hotel and bungalow camp accommodations, meals, sight-seeing tours and all gratuities.

A descriptive booklet giving details of the trip will be gladly mailed upon request to Dean Laird or any Canadian Pacific Agent. As the party is limited to 150 it is advisable to make reservations early.—Advt. 22/4

RENNIE'S ONION SETS

For producing early lunching Onions or Large Onions if left to grow to maturity.

By planting Rennie's Dutch Sets you will have better success in raising fine well-flavored onions, either for bunching or eating green, and ready for the table in 6 weeks from time of planting.

Rennie's Dutch Sets represent the best obtainable, and have won favor from both home and market gardeners for their superb quality and unusual productiveness. Place your order for Rennie's Dutch Onion Sets with your local Seed Merchant. If unable to obtain them locally, write us direct.

Ten Dollars and under cash; four months credit; three per cent. off for cash on sums over Ten Dollars. Jas. A. Livingston, auctioneer.

News and Views of SPORT

ALL GRIMSBY TRAINED TEAMS HAD MOST SUCCESSFUL SEASON

Canadiens, Saskatoon, Peach Buds, Peach Queens All Went Far in Hockey Race As Well As Peach Kings—Dope Bucket Has Been Sent to the Storehouse.

Well Spud, we will soon be picking strawberries and basking in the shade of the sun that casts its rays on all sides of the pickets while the cooling zephyrs wafted from off Joe Hand's playground, Lake Ontario, cool our fevered brow, but before we cast the old dope bucket into the storehouse for a six months rest we must at least review the past hockey season a little just to show the great benefits that Grimsby has derived from the energy and work of Leslie John Farrell and Cecil M. Bonham, the men who built the Grimsby Arena and caused all these beneficial results.

Last fall Grimsby and Montreal Canadiens for the third time trained on Grimsby ice. They finished third in the N. H. L. and defeated St. Patricks of Toronto in the play-off for the right to meet Hamilton in the finals. Hamilton players showed a Bolshevik strain and went on strike and Dandurand's Dandies were declared champions and hoisted aboard a C. P. R. train for British Columbia where they met Victoria for the Stanley Cup. Ill luck dogged their footsteps and they lost the cup winning only one game out of four played, but their great seasons work showed the benefits of their Grimsby training.

Newly Lalonde brought his Saskatoon Sheiks to Grimsby to train. In the Western Canada league race they finished second and were defeated in the play offs by Victoria by one goal. Another team that went far as a result of good early training.

Grimsby Peach Buds owned and controlled by the mighty hockey magnates "Jimmy" Farrell and Brown Malrough won their group in the junior series of the O. H. A. and defeated Oakville in the third round play-offs. In the fourth round they were put out by St. Andrews of Toronto who forced the Aura Lee champions to go into overtime to beat them one goal on the round. Pretty fair work for a young green team on its first season out.

Now come the youth and beauty of the Fruit Belt, the Peach Queens. This speedy collection of young ladies in the third round of the L. O. H. A. trimmed the famous salt lumps and made them like it. They lost out in the semi-finals to Toronto Varsity which team won the championship from Ottawa Alerts.

Of course you all know of the remarkable work through the season of the Peach Kings, intermediate champions and conquerors of the great Soo Greyhounds, so their feats need not be recounted here.

Is it not a wonderful record for a town the size of Grimsby to have five teams, two professional and three amateur, to train in their rink and every one of them reach the semi-finals or finals in their respective leagues. Grimsby should be thankful and proud of the two boys that made this great feat possible when they fought, worked and schemed in a million ways to put the present arena where it is.

LACROSSE TEAM WILL ORGANIZE

An effort is being made to organize a junior lacrosse team in Grimsby, and a meeting and practice will be held on the school grounds on Good Friday afternoon to get the boys together. Beamsville boys have been asked to come, and with the material that both towns can produce there should be an excellent team. Turn out boys whether you have a lacrosse stick or not. Get the team started. Remember lacrosse is Canada's real national game; and develops young manhood more than any other sport.

During his visit to a village school an inspector put this question to a class of little girls: "If all the good people were white, and all the bad people were black, what color would you be?" Some answered "White" and others "black". But little Mary replied: "Please, sir, I would be grey."

JUNIOR TEAM HAS BIG LOSS

The following statement has been prepared showing that from a financial standpoint the past season was a bad one for the Peach Buds. The statement is as follows:

Paid to Hamilton Rovers	\$25.50
Club re game at Grimsby	13.80
Expenses to Niagara Falls	31.60
Expenses to Port Colborne (exhibition)	20.40
Paid to Oakville re game at Grimsby (second round)	35.00
Expenses to Toronto St. Andrews game	65.55
Expenses to Port Colborne, two trips, (Round Trophy)	74.40
Paid to C. T. Farrell, ex account uniforms	45.00
Account owing C. T. Farrell	32.33
Account owing L. J. Farrell	10.06
Paid to R. H. Kidd, re O. H. A. Fees	6.00
Account Dr. D. H. Gester	2.00
Lunches for team re home games	21.40
Account C. P. R. Telegram	.71
Total	\$383.69

Receipts	
Received from Hamilton Rovers	25.50
Received from Port Colborne re Round Trophy	17.10
Received from C. T. Farrell re home games	164.20
Total	\$206.90
Balance	\$176.79

MAKE CHANGES IN GAME LAWS

The Game committee of the Legislature have been considering the Fish and Game Act. At a meeting of the committee last week partridge were declared out of season for three years except in a few sections where they are plentiful. The deer and his game seasons remain the same and a proposal to ban the sale of venison was defeated. A license fee of \$1.00 will be imposed on all guns where the county council requests it except for hunters on their own land.

PAINT! PAINT!

Lowe Brothers LIMITED
PAINTS & VARNISHES

ENAMELS

Lunduro is an exceptionally easy working enamel. Any amateur can use it with excellent results. It produces a porcelain finish.

Floor Paint

This is a Floor Enamel of surprising durability. It is easily applied, dries overnight to a high, tough gloss finish. Does away with scrubbing.

Qts. \$1.50, Pts. 80c

Auto-Gloss

Any novice can refinish his car in a few hours with Auto-Gloss. It gives a rich, hard, weather-proof gloss. Dries quick and is very durable.

Qts. \$2, Pts. \$1.10, 1/2 Pts. 60c

MELLOTONE Flat Wall Paints

Mellotone is a beautiful and washable flat wall paint. It is easy to apply, dries quickly free of brush marks and is very economical.

Qts. \$1.40, Pts. 75c

NEPTUNITE VARNISHES

The most nearly perfect Varnishes made. They will not crack or turn white under hot or cold water. Will withstand the heat of hot dishes, etc.

Qts. \$2, Pts. \$1.10, 1/2 Pts. 60c

The reason for the superior covering, hiding properties, and durability of Lowe Brothers "High Standard" Products, is to be found in the purity of the lead, oil and other ingredients used; the care exercised in their manufacture, and the fineness to which they are ground by very powerful machinery. They give a beautiful, protective finish which lasts for years.

Concrete Highway on Dundas Mountain, near Dundas, Ontario

"It's the little they cost to maintain that makes Concrete Pavements economical."

PERMANENT Highways of CONCRETE

Road building programmes must keep pace with traffic growth

This is admittedly a motor age. Our roads are filled with every type of motor vehicle and the number is increasing every day. The mileage of permanent highways capable of sustaining this traffic is totally inadequate.

Paving has become an economic necessity. We could not stop the growth of motor traffic if we would. We must therefore bring our roads up to a standard that will carry it with comfort, safety and economy.

Careful choice of paving material is imperative if we are to keep our road building programmes from becoming a financial burden. Concrete roads are usually the wisest selection.

They are permanent, withstanding the shocks of heavy loads that would speedily demolish a less durable material. They need very little upkeep. They protect the taxpayer's pocketbook.

SOCCER SEASON ON GOOD FRIDAY

Will Open With Game Against Canadian National Railway Team, of Hamilton—Many New Players on Line

No sooner had the hockey sticks been put into the old wood box than the soccer club was on the school grounds, chiving the leather around and loosening up their knee joints. Each Tuesday and Thursday evening and Saturday afternoon for the past three weeks the locals have been practising, new prospects tried out, and everything put in shape for the curtain raiser which takes place on the local campus on Good Friday morning at 11 o'clock, with the C. N. R. team of Hamilton.

This season the team is comprised of players from Grimsby, Beamsville and Vineland, and the club is still open to receive any new player who is desirous of signing up.

The clubs that comprised the H. & D. League last season are changed somewhat, C. N. R. (1924 Ontario champions), Burlington Steel, A. O. F., Corinthians and Hillcrest of Hamilton being the only Hamilton clubs that were seen here last season to enter the competition this year. Grimsby and Beverley are again on the list, while the newcomers are Zimmerkneits of Hamilton, Dundas and Rockton.

The officers of the club for 1925 are: President, J. S. Jackson; Vice-President, S. E. Spencer; Secretary-Treasurer, F. T. Shoobridge; Captain, Geo. P. Warner; Vice-Captain, E. S. Mason; Trainer, Chas. A. Mason.

In the practices that have been held good ability has been shown, Ray Stone of Beamsville hockey fame and Tom Warner being the likely custodians of the goal net. On the full back line we see Dick Snelgrove and Bert Sims, while Geo. Warner, Ernie Mason and Frank Shoobridge or Tommy Agnew fill the positions on the half back line. There is a whole lot of material available for the forward positions, Geo. Brinnell, Jack Jenkins, Arthur Broadley, Chas. Platts, and his brother James Jimmy Marshall, and Ronald St. George, all being able to make the grade, and it is a difficult matter that the selection committee has on hand to determine just what the lineup will be for Friday's game.

A general meeting is called for tonight Wednesday, at the home of "Steve" Spencer on Doran Avenue at 7.45 at which all signed players are requested to be present, as well as any other of the fans who have the interest of the club at heart.

Don't forget, Friday this week, at 11 a.m. C. N. R. vs Grimsby at the School Grounds.

PLUMS FOR CANADA.

(Experimental Farm Note).

"Comparatively few people get good plums to eat, especially in the fresh condition, and the export trade in plums, whatever it may be in the future, is practically nothing at the present time," writes W. T. Macoun, Dominion Horticulturist. "The plum has not been as profitable to grow in Canada as some other fruits, 'concludes Mr. Macoun,' but with a careful selection of varieties and good care it will be found to give fairly good returns. In those parts of Canada where the European plums do not succeed, the improved native and American varieties have been found very profitable."

A new bulletin by W. T. Macoun, Central Experimental Farm, Ottawa, is now in the press and will very shortly be ready for distribution. This bulletin deals with every phase of plum culture, and among other valuable features, gives a complete list of varieties recommended for the different parts of Canada, from Prince Edward Island in the east to British Columbia in the west. There is also a description of the varieties included in the list just mentioned. This bulletin, entitled "Plum Culture," (No. 45, New Series) which is perhaps the most complete of its kind yet issued by the department, will be sent free on application to Publications Branch, Department of Agriculture, Ottawa.

IN MEMORIAM

In loving memory of my dear son, Edgar Philby, who passed away, April 12, 1924.

There's a face that is haunting me ever,
There's a voice I am longing to hear,
There's a smile I will remember forever,
The I try to forget every tear,
There's a sad, but sweet, remembrance,
There's a memory, fond and true,
There's a token of affection, dear Edgar,
And my heart still aches for you,
Sadly missed by Mother and Sister.

SHORTS AND CHOP.

A farmer's scientific training is now judged by the length of the aerials to his radio.

Two blades of grass can often be made to grow where one grew before simply by using better seed.

The value of the farm and village

garden is usually underestimated. It is of real economic importance and is indispensable from the standpoint of good health.

During the year 1924 12,783 horses and 196,297 cattle were shipped from Alberta. Shipments between local points within the Province totaled 5,618 horses and 166,456 cattle.

In pruning the raspberry in the spring the first thing to do is to take out the wood that has been killed during the winter. The biggest year-old canes of those that are left will bear the most fruit and the best fruit.

This was actually overheard in Devon. Two workmen were discussing politics. "I dunno what a Socialist is one of them. 'The I'll tell you," replied the other. "You've got a socialist area. You give me 'alf; I've got 'half-a-crown, and I keeps it."
